EHT
WERKZEUGMASCHINEN

A flexible tool system for individual V dies and the VarioTool.

EHT VarioTool – a flexible lower tool for dies of 120 to 300 mm.

The advantages for you at a glance

- Cost-effective bending of small and thick parts.
- Optimal load capacity with 4000 kN press force.
- Low setup times with the flexible tool system.
- Standard and power tools can be used.

Areas of application

- Forestry and construction machinery.
- Agricultural equipment and machinery.
- Vehicle manufacture, commercial vehicles, trucks, buses.
- Ship building.
- Defense and security technology.
- Structural steel fabrication.

Technical data	PowerPress 400
Press force	4000 kN
Bending length	1500 mm
Max. load per meter	6000 kN
Usable open height	500 mm
Stroke	400 mm
Rapid speed	160 mm/s
Dimensions	2.5 x 2.3 m

Bends small and thick components particularly efficiently.
